

KRISHGEN PUDGALA LLP

**ACCURATE AND RELIABLE IVD TEST KITS
THAT GUARANTEE LONGEVITY, SPECIFICITY,
SENSITIVITY AND ACCURACY.**

ABOUT US

KRISHGEN is a leading biotech manufacturer and distributor established since 2003. We are the leading Indian manufacturer of ELISA kits for life sciences with over 1000+ product citations.

Our products are manufactured in our state of the art IVD facility set up over 10,000 square feet in Navi Mumbai, Maharashtra, India. The facilities are fully certified and ready equipped for inspection to comply with the new Medical Device Rules (MDR) being implemented in EU.

ABOUT KRISHGEN

Krishgen Pudgala LLP is an in-vitro diagnostic device manufacture that is part of the Krishgen Group. Our expertise in developing assays stems from our parent company, Krishgen Biosystems, that has developed and manufactured these assays for research purpose.

Having worked with antibodies, proteins, DNAs and RNAs since 2003, our years of experience has helped us offer the best solutions for diagnostics. Our research encompasses many technologies including protein expression, peptide designing, antibodies generation, immunoassays over Immunochromatography, ELISA, TRF, TR-FRET, HTRF and molecular biology with PCCR, RT-PCR, SSP and NGS.

We work with leading research institutes like AIIMS, NIPER, IISER, PGMIR, IMTECH, NIV, NCCS, NARI amongst others. We also work with all leading biotech and CRO companies in India.

With over 40% of our ELISA kits manufactured being exported; our products are available in 15+ countries worldwide.

CERTIFICATIONS

Our facility and products are ISO13485 certified. We also possess ISO9001:2016 and CE marking for many of our products.

Our establishment is US FDA and CDSCO (India) registered with many of our ELISA kits available as IVD in the US markets.

MANUFACTURING AND QUALITY ASSURANCE

Our products are manufactured in our state of the art IVD facility set up over 10,000 square feet in Navi Mumbai, Maharashtra, India. Equipped with clean rooms and separate air handling units (AHUs) for different products (rapid kits, ELISA kits and PCR kits), we ensure there is no cross over contamination. The clean room floors are epoxy coated, use HEPA filters and positive monitored air-pressure to reduce bio-burden in the production areas.

With our expertise in developing some of the most unique assays worldwide, our IVD ELISA kits have the biggest advantage of being fully validated.

Our kits are validated for a high degree of sensitivity, specificity, accuracy and precision. We ensure that our kits not only operate during the shelf life but also ensure that stress tests are conducted on each individual components to ensure our kits offer ease-of-use and reproducibility.

Being from the research space for many years, QUALITY is a way of life for us.

We are as good as our components. THE HEART of each ELISA is the antibodies and antigens. We partner with leading US and European manufacturers to ensure that we get the best reagents. A majority of our ELISA are sandwich formats using double antibodies to offer a high degree of accuracy and use monoclonal antibodies for higher specificity and reproducibility.

**QUALITY
YOU CAN
TRUST**

TECHNICAL SUPPORT

Not used to running ELISA or require product/technical support? No problem! With the plethora of technologies available, we can offer you online support in any part of the world. ELISA is a way of life for us. We can read your raw data and understand what is required to offer you support.

We use the best of the softwares and instruments to support you.

Our laboratory facilities include TECAN Safire2 multimode reader, Automated DS2 Dynex processors, Luminex Magpix Reader, plate readers, automated coating lines from Berthold Technologies, Germany and Moduline Systems, USA.

We use Magellan software and GraphPadPrism for our data reduction.

WHEN YOU BUY KRISHGEN PRODUCTS, YOU ARE IN SAFE HANDS.
